HEKA PRES hydrophilic drainage dressing

Hydrophilic gauze split dressing, made with 100% cotton; degreased and bleached. Non-fraying, folded. High longitudinal and lateral tensile strength, high absorption, breathable, soft.

Application: Y-shaped pre-cut slit ensures a perfect fit around a drain or cannula.

	ref	size	layers/thread	content	package
sterile	VA 0009	10 x 10 cm	16/17	80 x 1	8 x 80 x 1

HEKA PRES ointment dressing

Designed to prevent wound adhesion to the secondary dressing, ensuring the wound stays moist and newly formed granulation tissue remains intact when the dressing is removed. It also keeps the wound edges supple. The ointment dressing can stay on the wound for several days. It can be covered with a gauze or non-woven dressing and fixated with HEKA Plast Fix plaster or HEKA Last fixation bandage.

Application: Superficial wounds such as grazing wounds, second-degree burns with intact blister or nail extractions.

	ref	size	content	package
sterile	KO 0810	10 x 10 cm	10 x 1	60 x 10 x 1

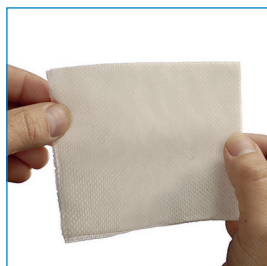

HEKA SYNTEC ointment dressing (synthetic ointment gauze)

Designed to prevent wound adhesion to the secondary dressing, ensuring the wound stays moist and newly formed granulation tissue remains intact when the dressing is removed. It also keeps the wound edges supple. The ointment dressing can stay on the wound for several days. It can be covered with a gauze or non-woven dressing and fixated with HEKA Plast Fix plaster or HEKA Last fixation bandage.

Application: Superficial wounds such as grazing wounds, second-degree burns with intact blister or nail extractions.

	KO 0920	7.5 x 20 cm	10 x 1	60 x 10 x 1

HEKA SOFT non-woven swab

Hypoallergenic, strong, soft and aerating non-woven swab. 70% Viscose, 30% polyester. The non-woven dressing has a tighter mesh than gauze, giving it a greater absorption capacity.
Application: Dressing dry/low-exudate wounds; cleaning the skin.

**HEKA ALUPAD** non-adherent wound dressing

Absorbent wound dressing made with 70% viscose and 30% polyester and a non-adherent aluminium layer. High absorption capacity. The metallic side of the dressing is placed on the wound.

Advantages:

- no wound adhesion
- pain-free dressing changes
- light to moderate absorption
- antibacterial effect

	ref	size	content	package

	OT 0330	10 x 12 cm	50 x 1	12 x 50 x 1

**HEKA SORB** absorbent wound dressing

Absorbent dressing with white, pure cotton wool absorbent padding. Low wound adhesion thanks to a special outer coating. Blue hydrophobic non-woven back, sewn into the edges to prevent leakage. Air-permeable, distributes exudate evenly throughout the dressing. The pure cotton wool padding is softer and more comfortable on the skin than pulp-based padding.

HEKA PLAST textile

10 Strips in a resealable plastic sachet.

	ref	product/size	content	package
none-sterile	PL 0302	10 strips • 10 x 6 cm	50 x 1	20 x 50 x 1

HEKA PLAST suture strips

HEKA PLAST suture and butterfly strips can be applied and removed without any pain. The strips are elastic to allow for any swelling around the wound.

Application: Closure of cuts.

	ref	product	size	content	package
sterile	PL 3200	suture strips	6 x 100 mm	20	250 x 4 x 5
	PL 3220	butterfly strips	12 x 70 mm	20	200 x 20

HEKA PLAST textile elastic

The wound plasters are soft, skin-friendly and comfortable. Owing to their high adhesive strength and elasticity, these plasters are ideal for moving body parts. The wound pad does not adhere to the wound to allow pain-free removal.

	ref	product	size	content	package
none-sterile	PL 5010	wound plaster	19 x 72 mm	100	12 x 100

	PL 5180	long finger plaster	120 x 20 mm	100	12 x 100

HEKA PLAST detectable

The aluminium strip under the wound pad and the conspicuous blue colour ensure the wound plasters are easily detectable. HEKAplast detectable is made with an improved PE-based formula, making the plasters stronger than regular PE. The wound pad does not adhere to the wound to allow pain-free removal.

Complex Wound Care

Decifera

DECIFERA transparent hydrogel

This hydrogel contributes to a moist wound environment thanks to its composition of water and binding agents, even if a wound is too dry. Applying the hydrogel to necrotic tissue will stimulate autolytic debridement.

	ref	product / content	content	package
sterile	SW 0040	8 gr.	5	40 x 5
	SW 0041	15 gr.	5	40 x 5

DECIFERA silicone sheet

The silicone sheet has a soft, porous structure, allowing optimal absorption of wound exudate by the secondary wound dressing. User-friendly thanks to the one-sided adhesive layer. This reduces the likelihood of maceration of the wound margin. The silicone wound contact layer prevents adherence of the dressing to the wound bed, thus protecting newly formed tissue. In addition, your patient will not experience pain when the dressing is changed.

	ref	product / content	content	package
sterile	SW 0100	5 x 7,5 cm	5	40 x 5
	SW 0101	7,5 x 10 cm	5	40 x 5
	SW 0103	12 x 15 cm	5	40 x 5

DECIFERA foam

A non-adherent, highly absorbent foam dressing. You can use this dressing for moderately to severely exuding wounds. Thanks to its porous structure, the dressing enables optimal absorption of wound exudate.

	ref	product / content	content	package
sterile	SW 0060	10 x 10 cm	5	20 x 5

DECIFERA foam silicone

The silicone contact layer on the wound side of the dressing prevents adherence of the dressing to the wound bed. It contributes to a moist wound environment. For the treatment of slightly to moderately exuding wounds. The foam silicone border is suitable for hard-to-dress wound areas.

	ref	size	content	package
sterile	SW 0071	7,5 x 7,5 cm	5	20 x 5

HEKAMED MEDICAL EXAMINATION GLOVES

These medical examination gloves are of extreme strong quality. Soft nitrile protects the user from body fluids like blood or saliva. Hands remain well protected and therefore are these gloves suitable to use in the food industry.

They can be used both left and right handed. The gloves are powder free, smooth and has texture on the fingertips. The sizes are clearly indicated by the color coding on the package.

HEKA SOFT non-woven dressing

Hypoallergenic, strong, soft and aerating non-woven dressing. 70% Viscose, 30% polyester. The non-woven dressing has a tighter mesh than gauze, giving it a greater absorption capacity.
Application: Dressing dry/low-exudate wounds; cleaning the skin.

	ref	product	size	content	package
sterile	OT 0010	non-woven dressing • 4 layers	8.5 x 5 cm	16	120 x 16

	OT 0018	non-woven dressing • 8 layers	10 x 20 cm	10	3 x 10 x 10

HEKA SORB absorbent dressings

Absorbent dressing with white, pure cotton wool absorbent padding. Low wound adhesion thanks to a special outer coating. Blue hydrophobic non-woven back, sewn into the edges to prevent leakage. Air-permeable, distributes exudate evenly throughout the dressing. The pure cotton wool padding is softer and more comfortable on the skin than pulp-based padding.
